Plans

Welcome to the UW-Madison
Vegetable Pathology Web Site

Our web site was initially established to provide progress reports on field trials during the growing season

W. R. Stevenson and R. V. James
University of Wisconsin-Madison
Department of Plant Pathology
1630 Linden Dr.
Madison, WI 53706

Current resources include:

- Tentative plans for 2006 trials
- Field trial reports from 1995-2005 (MS Word® and/or Acrobat®)
- Progress reports from current field trials will be available as data are collected and analyzed (to view on screen)
- Vegetable crop updates as issued (+ "archives" from previous years)
- Weather data from four potato growing regions of WI during the growing season (to use in the WISDOM or Real Toolbox crop management programs)
- P-Day and Severity Value accumulation for 4 potato growing regions of WI
- PowerPoint® slide sets on various vegetable pathology topics
- Links of interest to other web sites
